

Located in Deison Technology Park

- **VGXI, Inc. recently signed as the first occupant of Conroe's Deison Technology Park**
- **The manufacturer of plasmid DNA for vaccines and gene therapies is currently in the schematic design phase of their new campus-style office and manufacturing site**
- **VGXI's planned 240,000 square-foot facility will help the company expand their business to manufacture more urgent vaccine solutions**
- **The facility in Conroe will allow VGXI to minimally triple production utilizing 1,500-liter fermenters (to multiply cells with DNA plasmid needed for vaccines)**
